We've got you covered. It's our true blue promise.

Home Office • 100 Erie Insurance Place • Erie, PA 16530
814.870.2000 • www.erieinsurance.com

One of the objectives of ERIE's Risk Management Administration Department is to assist our Policyholders in developing, maintaining and refining management techniques for effective control of economic and personnel loss.

Controlling losses and providing safe, healthy work environments, products, and services is a normal, integral part of managing any business. Erie Insurance provides comprehensive risk management and claims services to Policyholders via dedicated, in-house loss control and claims staff.

And, to enhance our service commitment to you, we've introduced Web-based workplace training programs developed by Summit Training Source, Inc. Web-based training programs offer users a convenient, cost-effective and time-efficient method of enhancing workplace safety programs or addressing areas of concern.

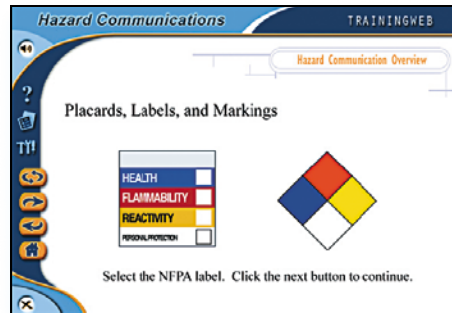

Summit Training Source has developed more than 100 Web-based training programs, each lasting about 45 minutes, which teach hazard awareness and best safety practices to prevent injuries and accidents in the workplace. All Web-based training programs from Summit are in compliance with OSHA training requirements.

These programs have been integrated into ERIE's holistic service approach and as an additional/alternative service for Policyholders. Customized service means that ERIE will work with you in identifying exposures as well as loss control opportunities and priorities and the most effective method of delivering workplace health and safety education.

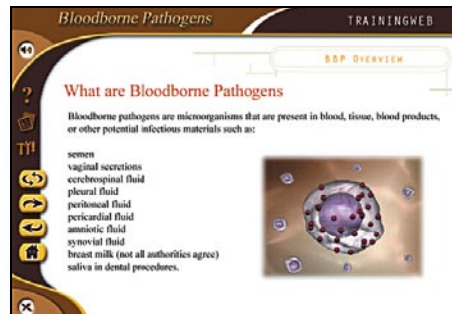

We welcome the opportunity to discuss our services in detail. We are eager to put our experience to use in helping to provide for your insurance needs. Working in cooperation with you, our loss control consultant can show you how one or more of the programs available can be tailored to your business.

For more information, contact your dedicated Erie Insurance loss control consultant or call the Risk Management help desk at **800.458.0811**, ext **4500**. You can also visit us online at www.erieinsurance.com or www.agentexchange.com. (Agents only)

Introduction to OSHA

EMPLOYEE HEALTH & SAFETY TRAINING BENEFITS

Erie Insurance has made employee health and safety a priority for our Policyholders and values the positive impact that training can have in terms of reduced accidents and injuries and lowered costs for our customers. Environmental, health and safety training teaches workers important safety practices that help them incorporate safety into everything they do. At Erie Insurance, we understand that your employees are your organization's most important resource. As an Erie Insurance customer, we encourage you to take advantage of this value-added service to protect your employees and your bottom line.

ABOUT SUMMIT TRAINING SOURCE, INC.

Summit's online platform, Summit Trainingweb[®], was chosen for the flexibility, comprehensive and technically accurate content and variety of courses available. Summit Trainingweb[®] is a robust and comprehensive online training platform. A list of courses is included in the back of this informational brochure. Summit's courses come complete

with interactions, state-of-the-art graphics, video and more to give your employees a total health and safety solution. Each course includes a quiz to ensure comprehension and retention of materials and a printable certificate of completion. Online training guarantees 24/7 availability as well as consistent training delivered to all of your employees.

HOW TO REQUEST A TRAINING PROGRAM

Online training programs are presented by Summit Training Source and comply with all OSHA and state requirements. Specially-trained Erie Insurance loss control consultants present all classroom training programs. If you are interested in receiving a classroom or online training program, contact your ERIE Agent or dedicated loss control consultant. When requesting a program, be sure to include the following information:

- Program name;
- Approximate number of participants;
- Date that you would like to hold the training session. Loss control consultants usually schedule training sessions at least two weeks in advance.

SUMMIT TRAINING SOURCE ONLINE SUMMARIES

Accident Investigation

This program offers a systematic approach to effectively investigate all types of accidents and determine their root causes so future incidents can be prevented.

Back Safety: The Ergonomic Connection

Back Safety teaches your workers how to maintain a strong back and prevent injuries using Summit's cutting-edge online training format.

Construction Safety Orientation

This comprehensive program covers a wide range of best safety practices for construction workers.

Decision Driving[®]

Increase the effectiveness of your training efforts by going online to teach your workers about safe driving techniques and strategy.

Electrical Safety

Employees learn to prevent electrical accidents and fatalities from occurring at your site with this online program on electrical safety.

Employee Safety Orientation

Training with Employee Safety Orientation will help you eliminate incidents and accidents in your workplace.

Eye Safety

This program trains workers to properly select and use the right eye protection. It is also designed to motivate workers to consistently use the equipment.

Fall Protection

This program will teach your employees about the importance of fall protection and measures they can take to reduce their exposure to fall hazards.

Forklift Safety

Instructs employees on how to meet regulatory compliance standards and eliminate forklift-related accidents.

Hand & Power Tools

Many workers forget the potential hazards. Summit Training Source's new Hand & Power Tools Safety training program puts safety at the forefront of common tasks.

Hazard Recognition

Teach your workers how to recognize potential hazards before they lead to incidents and accidents.

Ladder Safety

Summit's Ladder Safety course will teach your workers how to safely work with and around ladders.

Leadership Skills for Safety—Supervisor Safety

This effective, interactive program helps reduce injuries and associated costs by motivating workers to follow best safety practices.

Machine Guarding

Machine Guarding shows the full range of machine guards and educates workers on their use and maintenance.

Road Rage

It's timely, relevant and critical for sales representatives, service people, delivery drivers, and anyone else who spends time behind the wheel.

Slips, Trips & Falls

Slips, Trips and Falls will help workers to be more aware of these hazards, and will help decrease the number of injuries resulting from them.
